

## ***greenpark***

### Grid for driveway surfaces with gravel or grass finishing

**Green Park** is a modular product made of environmentally friendly, recyclable thermoplastic resin. It makes grassy areas suitable for vehicular traffic by protecting the surface from damage caused by the transit and parking of wheeled vehicles, including heavy equipment. It is distinguished by its ornamental effect, easy to install, maintenance-free, and withstands the stresses of use under extreme environmental conditions over time.

The different contouring on the two opposite sides make **Green Park** extremely versatile, in that it can be installed with either side facing upwards; when it is installed with the thinnest ribs facing upwards, this creates drive-over areas and paving with grassy or gravel finishes, and installation with the thinnest ribs facing downwards creates temporary green areas for pedestrian use.

It is available in green and white to harmonise with any finish, even with gravel while preventing its dispersion, among other things.

## TECHNICAL DATA AND PACKING

### GREEN PARK

Dimensions*	cm	58 x 58 x 4 h
Pieces per sq.mt.	pcs	≈ 3
Piece weight	kg/pcs	1,796
Load capacity with empty cells	t/m <sup>2</sup>	187
Load capacity with full cells	t/m <sup>2</sup>	360
Water reserve	l/m <sup>2</sup>	1,5
Colour	-	green, white
Pallet dimensions	cm	120 x 120 x 240 h
M <sup>2</sup> pallet	m <sup>2</sup> /PAL	140
Pieces per pallet	pcs/PAL	420
Pallet weight	kg/PAL	768

\* In consideration of the recycled material, it is permitted a size variation of 2.5%, for the same reason the colour tone is subject to variation.

### ASSEMBLY OF GREEN PARK

1. Face all the gratings in the same way, with the female hook in the upper left-hand corner;
2. The first grating is placed in the upper left-hand corner of the surface in need of flooring;
3. Proceed with the assembly of the various gratings according to the direction that is normally used for writing: from left to right and downward from above.

In case of slopes it is important to consider the adherence coefficient. For this reason, assuming prudentially a wet surface and tires and medium/high use status, it is not recommended to use Green Park for inclinations greater than 8%. Adherence can be improved by inserting joists in stone material. The use of locking rings is mandatory for laying on inclined surfaces.

## ACCESSORIES

### SIGNALLING ELEMENTS

Colour	-	blue, yellow, white
Pieces per box	pcs	25

### LOCKING RINGS

Colour	-	white, green (only for the big one)
Pieces per box	pcs	25

## PACKING AND TRUCKING

1 pallet: 4 piles of 75 pieces

Pieces for pallet: 300

Pieces for truck: 7.200

## LABELLING

Each pallet is identified with:

A coloured band containing:  
the brand, a type image of the product,  
the Company name, the website and  
any warnings.
